The New Kamiq

Explore your many sides

Exploring is part of who we are. From everyday discoveries to great voyages, you need a bold companion to explore the world. To explore yourself. Someone like the Škoda Kamiq. With the Kamiq, the go-anywhere capabilities of the small SUV are packaged in a playfully creative design. Inside, it is as attractive and functional as ever with a long list of comfort, connectivity and safety features. Life is made easier with touches of everyday magic like the LED headlights, Climatronic panel and an immersive infotainment display. That's the smart way to explore. That's what we call Škoda.

Introducing the Kamiq.

Some of the equipment shown is optional.

Explore beauty from every angle

Bold style for the everyday explorer. The perfect SUV for the city, the Kamiq blends everyday comforts with adventure-ready capabilities, whenever you need them. As well as a bold look that constantly demands attention.

Dynamic front design

The eye-catching design starts in the front, with the wider grille, sharper headlights, and distinctive new bumper. Together, they give the Kamiq a more solid, dynamic style.

Side view

Designed to protect passengers in the back from glare, the rear-tinted windows also beautifully draw attention to the Kamiq's signature Škoda design lines and precise edges.

Rear view

From the back, you'll notice the rear bumper with integrated diffuser and restyled rear lights. Together with rear reflectors, the taillights create the characteristic C-shape, making the Kamiq immediately identifiable. A family explorer with an impactful look.

Some of the equipment shown is optional.

Turn on the light show

The Kamiq powerfully combines robust design with signature Škoda styling. This is design without compromise. Beauty without limits. A crossover that leads, but never follows.

Matrix LED headlights

As eye-catching as they are practical. The crystal-structured three-dimensional design is one of the most prominent visual features of the car, while advanced LED Matrix technology improves visibility for the driver.

Panoramic roof

From the outside, the panoramic sunroof embodies a sleek, stylish design. From within, it brightens the interior and opens the view of the sky above.

LED rear lights

Never go unseen thanks to bright LEDs and an immersive design. The crystalline elements of the rear lights, paired with the dynamic turn signal, will ensure you always attract the attention of those behind you.

Exploration begins within

Family-friendly, yet driver-focused and built for style, the new interior's dominant features include the 8" Digital Display and the new Infotainment display in the middle of the dashboard. The dashboard also boasts a choice of new upholstered décors made of fabric, microsuede or the new Carbon look. These are matched by the redesigned seat upholstery for all trim levels.

Some of the equipment shown is optional.

Virtual cockpit

Replacing the traditional instrument dials, the dynamic 10.25" digital display can be customised with five views (Classic, Basic, Extended, Modern and Sports).

LED ambient lighting

Your interior, your way. The LED light strip located below the dashboard's decorative trim offers a choice between red and white colours to set off the atmosphere with a finishing touch.

2 front and 2 rear USB-C ports

With a pair of 45W fast-charging USB-C slots for both front and rear passengers, you can keep your devices charged at all times with ease.

8" Digital Display

The Kamiq is now fitted as standard with an 8" Digital Display that offers three layouts—Speedometer, Tachometer and Digital. It is complemented on both sides by two backlit templates, which fluidly flow on from the display to create one coherent surface.

Innovation
at every turn

Stay online on the go

With the SmartLink feature, supporting Apple CarPlay and Android Auto, the car's infotainment system allows you to use your phone safely while driving.

Some of the equipment shown is optional.

Big on practicality

Wherever your exploring takes you, it's always good to have space for everything. Even better to have things well-organised and secured safely. With 400 litres of luggage space and various clever storage solutions, you'll never have to leave anything behind.

Packed with creativity

Style and substance has always been the Škoda design way. The Kamiq's spacious boot continues the trend, featuring a host of design touches that ensure your belongings stay in place and your car stays clean.

Net programme

Have everything you need secure and in sight. This set of three nets prevents your items from moving around while keeping them visible.

Cargo elements

The easy way to secure larger items, cargo elements are fixed to the floor using velcro and can be folded into any angle.

Double pocket

Keep your things organised with the double pockets on the rear sides of the front seats. The larger one is perfect for a small laptop, while the smaller one securely fits a smartphone.

Glasses compartment

A glasses compartment above the rear-view mirror can be used to store your sunglasses or reading glasses. They are protected from damage in their own dedicated pocket and you have the peace of mind that they will always be at your fingertips.

Some of the equipment shown is optional.

We've got you covered

You never know what you might encounter on the road. To ensure that the car is ready to handle any situation that may occur en route, additional assistants with multiple functions are on hand to keep you safe.

Matrix LED headlights

The LED Matrix headlights feature Matrix Beam Function. This allows you to use the high beams continuously, without blinding other drivers. Using a windscreen camera, the Matrix Beam Function responds to the traffic situation and turns off only some segments of the light. Other segments are turned on and illuminate the road.

Lane assist

This feature monitors road markings and helps the driver to keep the car in lane by nudging the steering wheel in a direction away from the lane marking.

Rear view camera

The rear view camera makes reversing and parking significantly easier. It shows the image of the situation behind the car on the infotainment system screen and displays guide lines to help you navigate through a difficult parking situation.

Front assist

Using a radar in the front grille, this smart feature monitors the distance from the vehicle ahead and automatically brakes to avoid any collisions. The system also includes predictive pedestrian protection, which warns the driver via an audio/visual signal, as well as a gentle jolt of the brakes.
